WELCOME MESSAGE

Dear Colleagues,

It is my great pleasure and honor to be chair for the INDUSTRIALCONNECT2025 conference. As someone who has always liked to carry out applications research at university in the field of advanced manufacturing, I have always understood the need to have strong connections to industry. If I can't fully understand the problems that manufacturers face, my work will be much less effective. My current role as Director of the Fraunhofer Innovation Platform for Advanced Manufacturing at the University of Twente, Netherlands, has also shown me that manufacturing industry thrives most effectively if these connections are properly developed and maintained by conferences like INDUSTRIALCONNECT2025, particularly if you want to explore further a field. The more you know and the more people you know, the better your decision making. That is why I am really look forward to meeting you in Barcelona, next February 24-26.

ABOUT VENUE

Barcelona is the capital and largest city of Catalonia and is Spain's second largest city, with a population of over one and half million people.

Located on the northeastern Mediterranean coast of Spain, this city has a rich and diverse history, with its roots dating back to Roman times. The fruitful medieval period established Barcelona's position as the economic and political centre of the Western Mediterranean. The city's Gothic Quarter bears witness to the splendor enjoyed by the city from the 13th to the 15th centuries

In 1992, Barcelona gained international recognition by hosting the Olympic Games which brought about a massive upturn in its tourism industry. For visitors, this has translated into the very modern, yet incredibly old city you see now in the 21st century, where new elements work to both preserve and celebrate both the city heritage and origins.

Barcelona is plenty of outdoor markets, restaurants, shops, museums, and churches. The city is also very walk able, with an extensive and reliable Metro system for more far-flung destinations.
